

SB 564

INCOLOY 800HT

BOLTING M

SB 564 covers nickel alloy forgings. These alloys are classified into different grades according to their chemical composition. Grain size and mechanical properties shall be measured. A tension test and nondestructive ultrasonic test shall be done on each forging. The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are for information only and are not considered standard.
